## Knitting/Crocheting/Sewing items for wildlife rehabilitation:

While on the surface it sounds fabulous to make items to help with rehabilitation of injured animals, both Dottie Daybell and I have seen posts on Facebook, Instagram and blogs that local assistance groups in Australia would prefer to not have global groups trying to help as it creates more layers of coordination and management that they just don't have time for. They have an adequate supply chain for their needs of joey bags, bat wraps and koala mittens at this point.
